July: Extreme heat

"Is this Bellevue or "Bel-Air"?

- What does it look like?
 - A really sunny day, enough to make people feel tired or lethargic
- When does it happen?
 - During the summer
- What can you do?
 - Stay inside
 - Have an air conditioner, or stay on the lowest floor out of sunshine
 - Drink plenty of water; avoid caffeine, sugar, and alcohol.
 - Cover windows that receive sun.

Feedback from Fire Prevention on Urban Fire Pictogram

- Word “catches” should be singular catch following the word clothes.
- Consider adding the word “unattended” cooking at the top left of the page
- Consider adding under the fire extinguisher “PASS-Pull pin, Aim, squeeze, sweep” acronym
- Consider adding a pictogram of a smoke detector and Carbon Monoxide detector with the words “ smoke detectors save lives one inside every bedroom and one in each hall outside” and “One CO detector on each level of home”
- The title “if outside” in the second response box does seem to fit if the response is evacuate the building? And maybe it should also say call 911 once safely outside?

Kathy's comments:

- Regarding the heater, fires don't start at the electrical outlet – they start with objects near them catching fire. Such items need to be three feet away to be safe.
- Add in something about a smoke detector, call 911, and then use a fire extinguisher is the last thing if the fire is small enough. =

P Pull the pin.

A Aim at the base of the fire.

How to use most portable fire extinguishers

*Always follow the operating instructions and recommended start back distance printed on the fire extinguisher's front label.

S Squeeze the handle & lever.

S Sweep from side to side.

- Pull & remove ring pin, breaking seal.
- Move to a safe position upwind of the fire.
- Remove hose nozzle from retention clip (if equipped).
- While keeping the extinguisher in a vertical position, aim nozzle at the base of the fire.
- Squeeze operating lever fully to discharge.
- Apply agent in side to side sweeping manner. Be careful not to splash or scatter the fuel.
- After fire is out, stand by and be prepared for any re-flash.

October: Zombies

~~If you are generally well equipped to deal with a zombie apocalypse you will be prepared for a [most other disasters].~~ " Dr. Ali Khan, Office of Public Response and Preparedness, CDC

- What does it look like?
- When does it happen?
 - ~~It doesn't – at least not in real life. But it's good to be prepared anyway!~~
- What can you do?
 - Make sure your kit is well stocked! If ~~you missed anything during back to school shopping, make sure you get it now.~~
 - Make sure your family has a meeting place
 - Make sure you have an evacuation route.

Your Family Disaster Plan

Where will your family be when disaster strikes? They could be anywhere—

at work

at school

or in the car. -

How will you find each other? Will you know if your children are safe?

Disaster can strike quickly and without warning. It can force you to evacuate your neighborhood or confine you to your home. What would you do if basic services—water, gas, electricity or telephones—were cut off? Local officials and relief workers will be on the scene after a disaster, but they cannot reach everyone right away.

Families can—and do—cope with disaster by preparing in advance and working together as a team. Follow the steps listed in this brochure to create your family's disaster plan. Knowing what to do is your best protection and your responsibility.

November:

"Blow your worries away – prepare for windstorms today!"

- What does it look like?
- When does it happen?
 - During the winter, accompanied by snow and floods sometimes
- What can you do?
 - If you're outside, move into a building.
 - If you're in a car, pull off the road and away from trees. Go to nearest building
 - Listen to the radio for instructions.
 - If inside, move away from windows and objects that could fall.

December – Winter

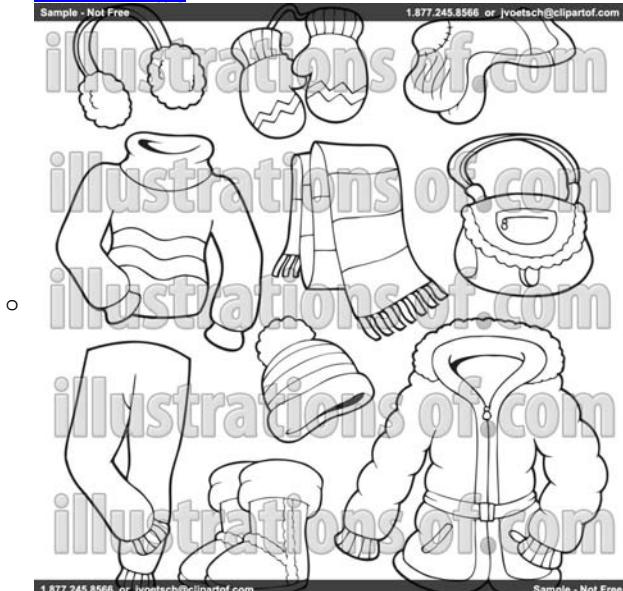

"Love the winter weather when your family prepares together!"

- What does it look like?
 - Wind, snow, rain, power outages.
- When does it happen?
 - From November to March.
- What can you do?
 - Bundle up!
 - Keep an eye on the weather and road conditions.
 - Heat your house and cook using approved mechanisms, i.e. NOT grills, hibachi, or propane heaters indoors.
 - Keep an emergency kit in your car, including blankets, jumper cables, etc.

January – Snow

“There’s no business like snow business.”

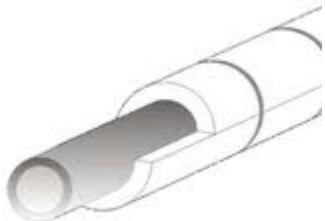

- What does it look like?
- When does it happen?
 - When temperatures drop, in between November and March.
- What can you do?
 - Keep salt and/or deicer to thaw out pathways and sidewalks.
 - Bundle up and make sure your emergency kit in your car is well stocked!
 - Make sure that your indoor and outdoor pipes are insulated; if not, let water drip overnight from your faucets.

February – Ice

"Frost bites – unless you're prepared!"

- What does it look like?
- When does it happen?
 - When temperatures drop, in between November and March.
- What can we do?
 - Be careful about driving!
 - Bundle up!
 - Make sure indoor and outdoor pipes are insulated; if not, let water drip overnight from your faucets.
 - Keep a snow shovel on hand to clear sidewalks and snow buildup.

March – Flooding

"Rain, rain, go away – prepare for floods right now, today!"

- What does it look like?
- When does it happen?
 - When we have an excess of heavy rain or snow, so in the wintertime.
- What can we do?
 - Learn the routes to higher ground
 - Monitor radio for alerts on if evacuation is needed
 - Avoid driving or walking through flood waters
 - If forced to evacuate, make sure to leave with plenty of time to make it to your destination.
 - Move furniture to higher ground, if you have time.
